**Digital Designer focused on crafting intuitive interfaces and motion-led visuals that improve user engagement. Applies design systems, interactive prototyping, and HTML/CSS foundations to turn concepts into testable prototypes and clear handoffs for development. Seeking an internship to refine UX practice and contribute to product design teams.**

## Education

### University of Roehampton, London, UK, Jun 2026 – 2026

Bachelor of Arts (Hons) in Digital Design

- Relevant Coursework: Visual Communication, UX/UI Design, Digital Media Production, Design Theory, and Interactive Prototyping.
- Academic Excellence: Actively engaged in advanced digital workshops and collaborative design studios.

### Christ Nagar School, Kerala, India , 2020 – 2022

High School - Computer & Mathematics

Graduated with 85% in State Board Exam 2022

## Courses

### UX Design Professional Certificate, Aug 2026

Google

## Skills

| Video Editing | Motion Graphics | Digital Photography | Visual Storytelling |
| Brand Identity | Typography | Agile Methodologies | |

## Additional information

### Cricket Player Auction Platform

- **AI-Driven Player Comparison:** Engineered an AI-integrated recommendation engine that analyzes player statistics to suggest "Similar Profiles," helping team owners make data-backed bidding decisions.
- **Real-time UX Strategy:** Designed a high-stakes, low-latency auction interface to ensure seamless user interaction during rapid-fire bidding phases.
- **Data Visualization:** Transformed complex cricket metrics into intuitive visual dashboards, making performance data digestible for non-technical users.

### Car Rental Website

- **Streamlined Booking Flow:** Developed an end-to-end user journey for vehicle discovery, filtering, and checkout, reducing friction in the reservation process.
- **Responsive Design:** Implemented a mobile-first approach to ensure the rental experience is consistent and functional across all device types.
- **Visual Hierarchy:** Utilized clean layouts and high-quality imagery to build trust and highlight key vehicle features and pricing.

### Uber Eats Blueprints (Redesign/Case Study)

- **Information Architecture:** Re-mapped the "Blueprints" (user flows) of a complex delivery ecosystem to identify and resolve existing bottlenecks in the order tracking process.
- **Component-Based Design:** Created a modular design system of UI elements to maintain visual consistency across various food categories and restaurant pages.
- **User Persona Analysis:** Conducted a deep dive into user habits to optimize the "Quick Reorder" and "Discovery" features for increased engagement.
